M-4132

94/7 wide x 75/8 deep
4,132 sq. ft.

"I designed this home for The Street Of Dreams in 1991. It was a huge success with its Contemporary exterior, Two story living room, and endless amenities. The Main Floor Master Suite, complete with sitting room and glass block shower are state of the art. The angled nature of the floor plan lends a feeling of cozy elegance to the facade. Upstairs are secondary bedroom suites with a co-joining bridge overlooking the foyer and two story living room."
