M-2834C
45/0 wide x 45/6 deep

This is truly an exciting contemporary design perfect for a steep downhill and/or side hill lot. The garage can enter from the front (as shown on rendering) or the side as the floor plan shows. There is drama, tons of natural light and large rooms wherever you look here. The square footage above includes the basement. Look at the awesome master suite here, and the stunning Contemporary appearance.!
